Dear TA:

Please note that I submitted everything priorto Sunday, 04/30/2017.

The reason I am resubmitting my project on Monday 05/01/2017 is that I changed my hardcoded project into using loops(The preferred way of solving this problem).

In otherwords the submissions I made on Sunday(04/30/2017) night is hard coded and the submission I made on 05/01/2017 is programmed according to the standard

I talked toDr Srdihar and he said to please take the above condition into considerationwhen grading the project. Instead of giving me a 20% grade deduction right away for late submission, please take my previous submission into consideration.

Please refer to Dr Sridhar if you have any concerns regarding this particular situation.

Thank You Very Much
